

January 29, 1976

that his name was Reeder and these are the type of housing, Mr. President, that are taking place to the south of us in Sarpy County and this, gentlemen, is the real fear, this is the DeCamp fear. Do you want the areas around you filled with the clusters of mobile homes that will drain the very blood from your tax base? This is what it amounts to. These are the people who go free and the other residents in the homes that are 50 and 80 and 100 years old are paying the taxes, and so when you get involved in this type of bill, it's necessary for Senator Keyes who has the sprawling area in which they like to put these type of homes out. I am surprised at Senator Keyes. Heaven sakes, Senator Keyes, you should be protecting the taxpayer who has been in that area for many, many years. And so I say, if ever there was a service done here today, we must compliment Senator Frank Lewis for having the intestinal fortitude to come back to this Legislature and ask that that Bereuter amendment be removed, and when you do that, you are placing Mahoney's amendment back from 1974 into the bill. The bill will be strong and we will protect with health and safety, Senator Bereuter, health and safety. These are the things that we are going to protect, to see that people are going to be represented rather than manufacturers and rather than particular builders of these types of establishments who are going to make a profit. Strike one for the people in the state. Place the Bereuter amendment out of this bill. Let health and safety reign. Let this bill pass so that there are good inspections, Senator Barnett, inspections that are most important. This is the most important part of it. I know that you would really stand here strong in behalf of this amendment but I noticed that you really didn't have your heart in it today. You were speaking in that low monotone voice, and so I hope that the Legislature will follow and not listen to these other voices and lastly the voice of Senator DeCamp who cries "wolf" too often and too many times to try to lead us astray, that bicycles, tricycles, tractors are what we are talking about. We are talking about homes where people live in, safety is involved, plumbing, plastic pipe, all of the dangers. These are the things that are the most important to the people who have to reside and live in these homes.

SENATOR SIMPSON: The lights keep coming on so I am going to break in and Senator Mahoney has asked me to introduce some guests he has in the Chamber today, and we have under the North and South balcony, both, 47, mostly ladies but some gentlemen, from Cristie Heights Seniors and I wish they would stand that the Legislature might recognize them. We are glad that you are all here today to listen in on our debate. Now, Senator Kennedy. Senator Kennedy, you have the floor.

SENATOR KENNEDY: Yes, I think, just very briefly, again, we are talking about the same thing continuous. I would hope that those that have not spoken would speak but I think we ought to get on about our business. I think the amendment that has been offered has been offered before. I would just hope that we would turn it down and do not
